

Study Sheet for:

7-156 FRAMING

The examination for 7-156 Framing consists of 50 multiple choice questions covering basic framing of houses and commercial building structures. The following books may be helpful in studying for this examination. This is not a comprehensive listing. Please note that it is not necessary to read all of the books below in order to pass the examination. Rather, this list is intended to suggest what types of books might be useful in helping to acquire the basic knowledge needed to perform this type of work. We try to keep this list current with books in print, but some books go out of print from time to time. These books may be available in your local library's collection, or through your local library by using the services of Inter-library loan. If still in print, these books may also be available through your local bookstore, or through the publisher.

The Homeowner's Guide to Carpentry and Cabinetry; Armpriester, K. E. and Bremer, B. A.; Sterling Publishing Co.; New York.

Rough Framing Carpentry; Currie, Mark; Craftsman Book Co.; Carlsbad, CA.
